# Reasons To Buy an Electric Time Bracket Clock

Since 1918 - Service & Support - Electric Time has been manufacturing tower and street clocks since Henry Warren's original electric clock patent of 1918. Electric Time can still fix products more than 80+ years old. No other firm in almost any industry can offer this service.

Raised Lettering - Unique in the industry Electric Time Company provides raised 3/16" thick aluminum letters.

Integrated Manufacturing - Electric Time manufactures the clock movements, the clock controller and the entire clock. We can provide parts for your clock, if it is two, twenty or eighty years old. Our clock movements are made of brass and stainless steel, they will not rust and will provide decades of reliable operation.

Finishing - Our paint system consists of an acid etched primer followed by a polyurethane top coat and a protective clear coat. The finishes have been tested and passed an ASTM UV and salt spray test.

UL & CUL Listed - Electric Time Company lists its street clocks under both UL and CUL (Canadian UL) standards.
